SPECIFICATIONS

Gauge	: 1.00 mm (Nominal)
Weight	: 420 gsm
Width	: 1,370 mm
Roll Length	: > 40 meter (Nominal)
Abrasion Resistance (Wyzenbeek Test)	: > 20,000 cycles
Colour Fastness to Light	: Grade 4

Tensile Strength	
Weft	: 73 kg / 3cm
Warp	: 52 kg / 3 cm
Bond Strength	: 17kg / cm ²
Stretch	
Weft	: 10 - 20%
Warp	: 10 - 20%

Color Matching Batch to batch variations in shade may occur within commercial tolerances.

Grain Retention
(at 105 C for 30 minutes) : No Loss of Grain

Clean Leather

Creating your healthy life-style.

What is Clean Leather?

Clean Leather is made by sea-island superfine microfiber (ultra-fine fiber bundle) and high-grade Polyurethane and Nylon resins.

Simulated by Japan's core processing technology, green Leather is very similar to the superfine collagen fibre of natural leather.

The best man-made Leather in 21 Century

Clean Leather not only replicates the softness and comfortable feeling of natural leather but also has excellent performances on aspects of elasticity, tensile strength, abrasion resistance, color fastness, etc.

Cleanest Upholstery Leather among natural leathers and artificial leathers to your health in the market.

The chemicals and dyes used to treat the animal hide all have their own smells, and that is what causes that "leathery" smell.

Benefits to use Clean Leather:

- True leather-like touch
- Luxurious feel
- High stain-resistance
- Superior durability
- Reduced UV yellowing compared to real leather
- Environmentally friendly
